

ENVIRONMENTAL POLICY WTÓRPLAST S.A.

We will conduct our activities related to industrial battery elements production according to legal and other environmental requirements, in a way that is not burdensome to the environment and local community. To achieve this goal, we created a set of rules, procedures and controls, comprising a Management System that is developed and perfected by the Senior Management and whole personnel.

To achieve this:

1. we conduct our activities according to emergency prevention (including risk limitation) and emergency action procedures,
2. we strive to use technologies allowing pollution prevention,
3. we take care to use raw materials that do not contain components harmful to the environment,
4. we strive to reduce waste and manage it in a rational way.

The Board of the company and the personnel declare that they will consistently realize set environmental goals, ensuring the availability of proper organizational actions and assets required to realize planned actions.

Grażyna Binda
Chairman of the Board
